Situation Overview

Remnants of Zeta

Philadelphia/Mount Holly

WEATHER FORECAST OFFICE

Hazard	Impacts	Location	Timing
Wind 	Widespread Tropical Storm Force wind gusts are unlikely. However, Tropical Storm wind gusts are possible along the NJ coastline. A Wind Advisory for 45-50 mph gusts is in effect for Delaware Beaches.	Southern DelMarVa and the immediate coastline of Delaware and southern New Jersey.	Late this afternoon into early this evening.
Storm Surge/ Inundation 	There is the potential for minor inundation especially with the full moon Friday.	Delaware Bay, coasts of New Jersey and Delaware.	Friday morning high tides.
Flooding Rain 	Expect multiple waves of heavy rainfall that could produce overland and road flooding as well as small stream flooding. This will likely be exacerbated by leaves on roadways and or clogged storm drains.	Delaware, northeast Maryland, South Jersey, and far southeastern Pennsylvania	This morning through this evening.
Tornado 	Tornadoes are not expected.		
Marine 	There is the potential for dangerous conditions due to high winds and seas.	All Atlantic waters and lower Delaware Bay.	This evening through Friday afternoon.
